**The National Theatre Studio – London SE1**

<b>Services:-</b>	Mechanical, Electrical, Technical Theatre Services, Controls
<b>Contract Value:-</b>	£1.4m
<b>Date of Completion:-</b>	November 2007
<b>Architect:-</b>	Haworth Tompkins
<b>Consulting Engineer:-</b>	Max Fordham LLP
<b>Theatre Consultant:-</b>	Charcoalblue

The National Theatre Studio is an outside facility to the main NT site on the Southbank in London. It provides multi-use space for performances, rehearsals, artist writing rooms and office accommodation. In addition to the periphery rooms, it consists of two large studio spaces and a smaller ‘Education’ space. Capri were responsible for the containment development and installation, lighting power and control wiring, sound and communication wiring, stage engineering supplies and installation of performance ‘sine-wave’ dimmers and facilities panels – working alongside Oxford Sound and Media. In addition to these specialist services Capri were responsible for the general mechanical and electrical installations throughout the building.
